MATERIAL HANDLING SOLUTIONS

PROVEN & DEPENDABLE

From receiving to load-out, each day your facility moves, weighs, loads, and samples millions of tons of material. The success of your operation relies not only on the quality of the commodity but the dependability of the equipment used to keep it moving. InterSystems' bulk material handling systems offer the speed and reliability you need to satisfy customers and grow profits.

From a modest beginning in 1959 as a maker of cardboard doors for rail boxcars, InterSystems has evolved into a worldwide manufacturer of a full line of bulk material handling equipment. Placing a customer-centric focus on the engineering and manufacturing process, InterSystems' product solutions include bucket elevators, bulk weighers, enclosed belt conveyors, en-masse and self-cleaning en-masse conveyors, gravity screeners, truck probes, automatic samplers, micro ingredient systems, bolted bin systems and distributors. Purchased by GSI in 2014, InterSystems' material handling equipment can be found around the world at grain elevators, in processing plants and at port facilities handling a wide variety of commodities including grains, powders, rock and wood pellets.

InterSystems believes that "custom" is standard, displaying a willingness to change in order to meet the needs of your specific applications with a solution. Behind each product line is an engineer leading a team dedicated to design improvements which promote efficiency and keep current with changes in industry regulations. Our in-house customer service team is on-call to assist with replacement parts or installation questions and can deploy a field technician to analyze problems and recommend solutions. InterSystems does it all while maintaining industry-leading delivery times.

INTERSYSTEMS KLEEN-DRAG CONVEYORS

InterSystems responded to the specific needs of the feed industry with the development of the Kleen-Drag Conveyor (patent #US6505727). The self-cleaning bottom and complete enclosure mean cleanout is easier and your plant operation remains sanitary. The Kleen-Drag Conveyor eliminates cross-contamination that can occur during receiving, manufacturing and packaging. For further prevention of co-mingling between production cycles, disinfectant can be run through the Kleen-Drag. The chance of pockets of material accumulating in the gates is all but eliminated through the flush-mount design. Additionally, the Kleen-Drag is specifically engineered to utilize slower chain speeds, promoting easy handling of sensitive products. Features also include a roller return system, beveled flights and a capacity of up to 35,000 CFH. It can be constructed of stainless, hot-rolled or galvanized steel with a variety of Abrasion Resistant (A.R.) liner packages.

When your operation calls for handling a variety of commodities, the InterSystems Kleen-Drag Conveyor is the ultimate solution.

CONTOURED TAIL DESIGN RESISTS ACCUMULATION OF MATERIAL

LARGE CAPACITIES CONVEYED IN COMPACT SPACE

BEND (KNEE) SECTIONS UP TO 60 DEGREES

CONVEYING INCLINE UP TO 60 DEGREES

UNIQUE TAPERED RAIL DESIGN

LINER FASTENERS PLACED CLEAR OF MATERIAL FLOW

LINERS CAN BE QUICKLY REPLACED WITHOUT PARTING OR REMOVING CHAIN

INTERSYSTEMS KLEEN-DRAG CONVEYORS

INTERMEDIATE GATES

Special attention was given to the design of these conveyors where intermediate discharges are required and “pockets” of material cannot be tolerated.

Intermediate discharge gates are used when there is a requirement for multiple discharge points. The Kleen-Drag gates open perpendicular to the conveyor and are flush with the bottom which means there is no “pocket” where material will collect and potentially cause cross-contamination.

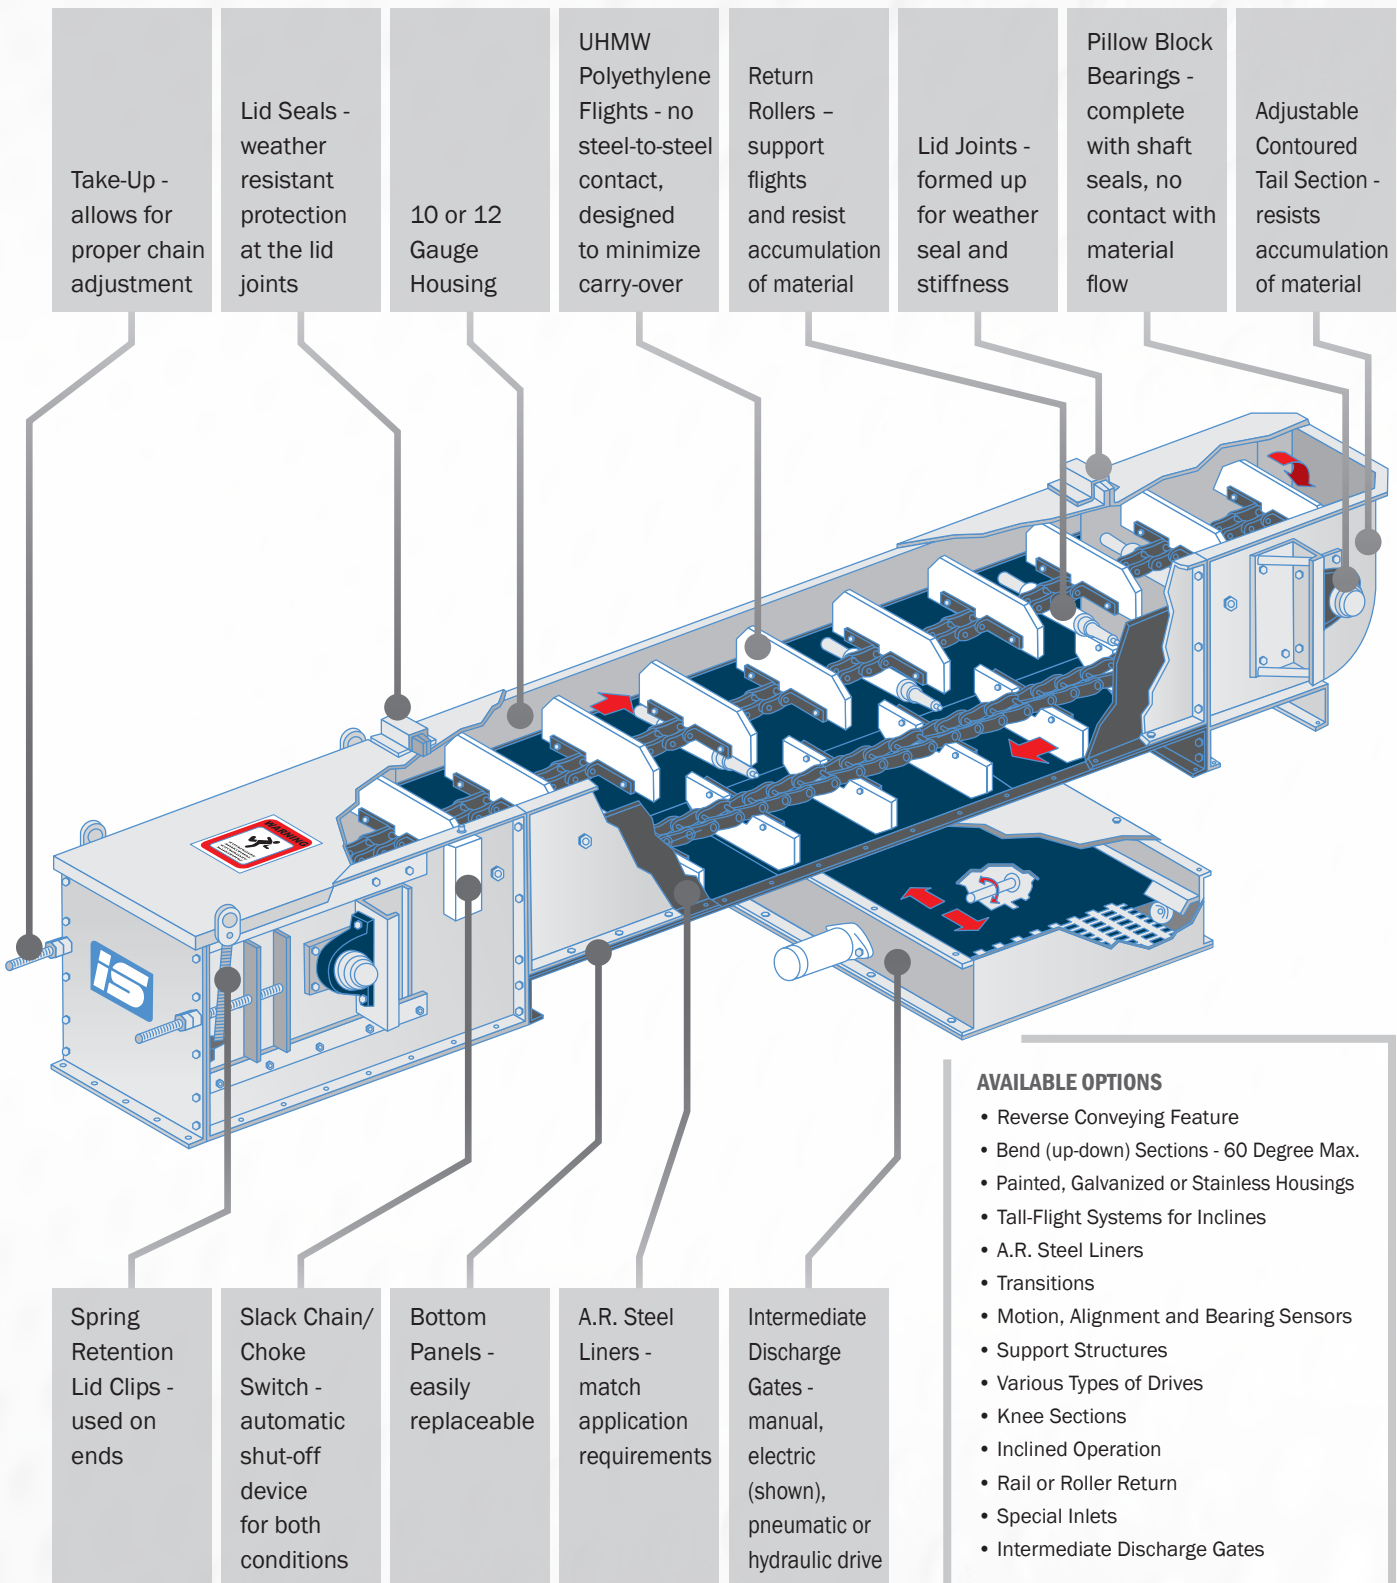

OPERATIONAL CONFIGURATIONS

InterSystems Kleen-Drag Conveyors are very adaptable and may be configured in a series of horizontal and/or inclined segments as shown. An application that might have formerly required multiple conveyor runs, drives and transitions, may be accomplished with a single Kleen-Drag Conveyor.

SELF-CLEANING EN-MASSE CONVEYOR

COMPLETE YOUR GSI SYSTEM

WWW.GRAINSYSTEMS.COM

40-SERIES™ GRAIN BIN

When determining the best system for your operation, we know that what's protected inside the bin is what counts most. Each GSI bin is efficiently designed to handle maximum loads for unmatched strength. All GSI bins are constructed using the highest-strength steel available.

TOWERS AND CATWALKS

GSI offers a full line of structures to support material handling equipment. Built to perform for the long haul, GSI's all new QuickBolt™ Towers and Catwalks are engineered to your facility's layout, taking wind, seismic and snow loading into consideration. GSI structures feature bolt-up assembly and hot-dipped galvanized finish.

ZIMMERMAN TOWER DRYERS

Not all tower dryers are created equal. What sets Zimmerman dryers apart is over 50 years of innovative design expertise and industry proven drying principles. The result is an easy-to-operate, easy-to-maintain, durable, fuel-efficient grain dryer, supported by an expert dealer network.

PREMIUM TRAINING, SERVICE & SUPPORT

InterSystems reaches a worldwide market and numerous industries with expertise in the manufacturing of material handling products and industrial sampling systems. Purchased by GSI in 2014, InterSystems is based in Omaha, Nebraska and operates out of a 200,000 square foot state-of-the-art manufacturing facility. InterSystems is ISO 9001 and 14001 certified.
